II QUARTER 2022

BAG EMPLOYMENT BAROMETER

The BAG Employment Barometer reflects companies' expectations regarding changes in employment in the next three months.¹

IN Q2 OF 2022, THE SURVEYED BUSINESSES GENERALLY HAD A POSITIVE OUTLOOK REGARDING EMPLOYMENT FOR THE NEXT THREE MONTHS. THE BAG EMPLOYMENT BAROMETER AMOUNTED TO 27.7 POINTS, MARKING AN IMPROVEMENT, BOTH COMPARED THE Q2 OF 2021 (BY 0.3 POINTS) AND Q1 OF 2022 (BY 2.8 POINTS).

Graph 1: BAG Employment Barometer

In Q2 of 2022, the BAG Employment Barometer was positive for all sectors. In Q2 of 2022, compared to Q1 of 2022, the employment barometer indicator improved in all sectors, except construction, where the employment barometer indicator decreased by 10.2 points. It is worth mentioning the manufacturing sector, where the employment barometer indicator improved by 10.6 points (see Graph 2).

In Q2 of 2022, compared to Q1 of 2022, the improvement of the employment barometer indicator in the manufacturing, service, and trade sectors can be associated with optimistic expectations regarding the growth of sales in the above-mentioned sectors.

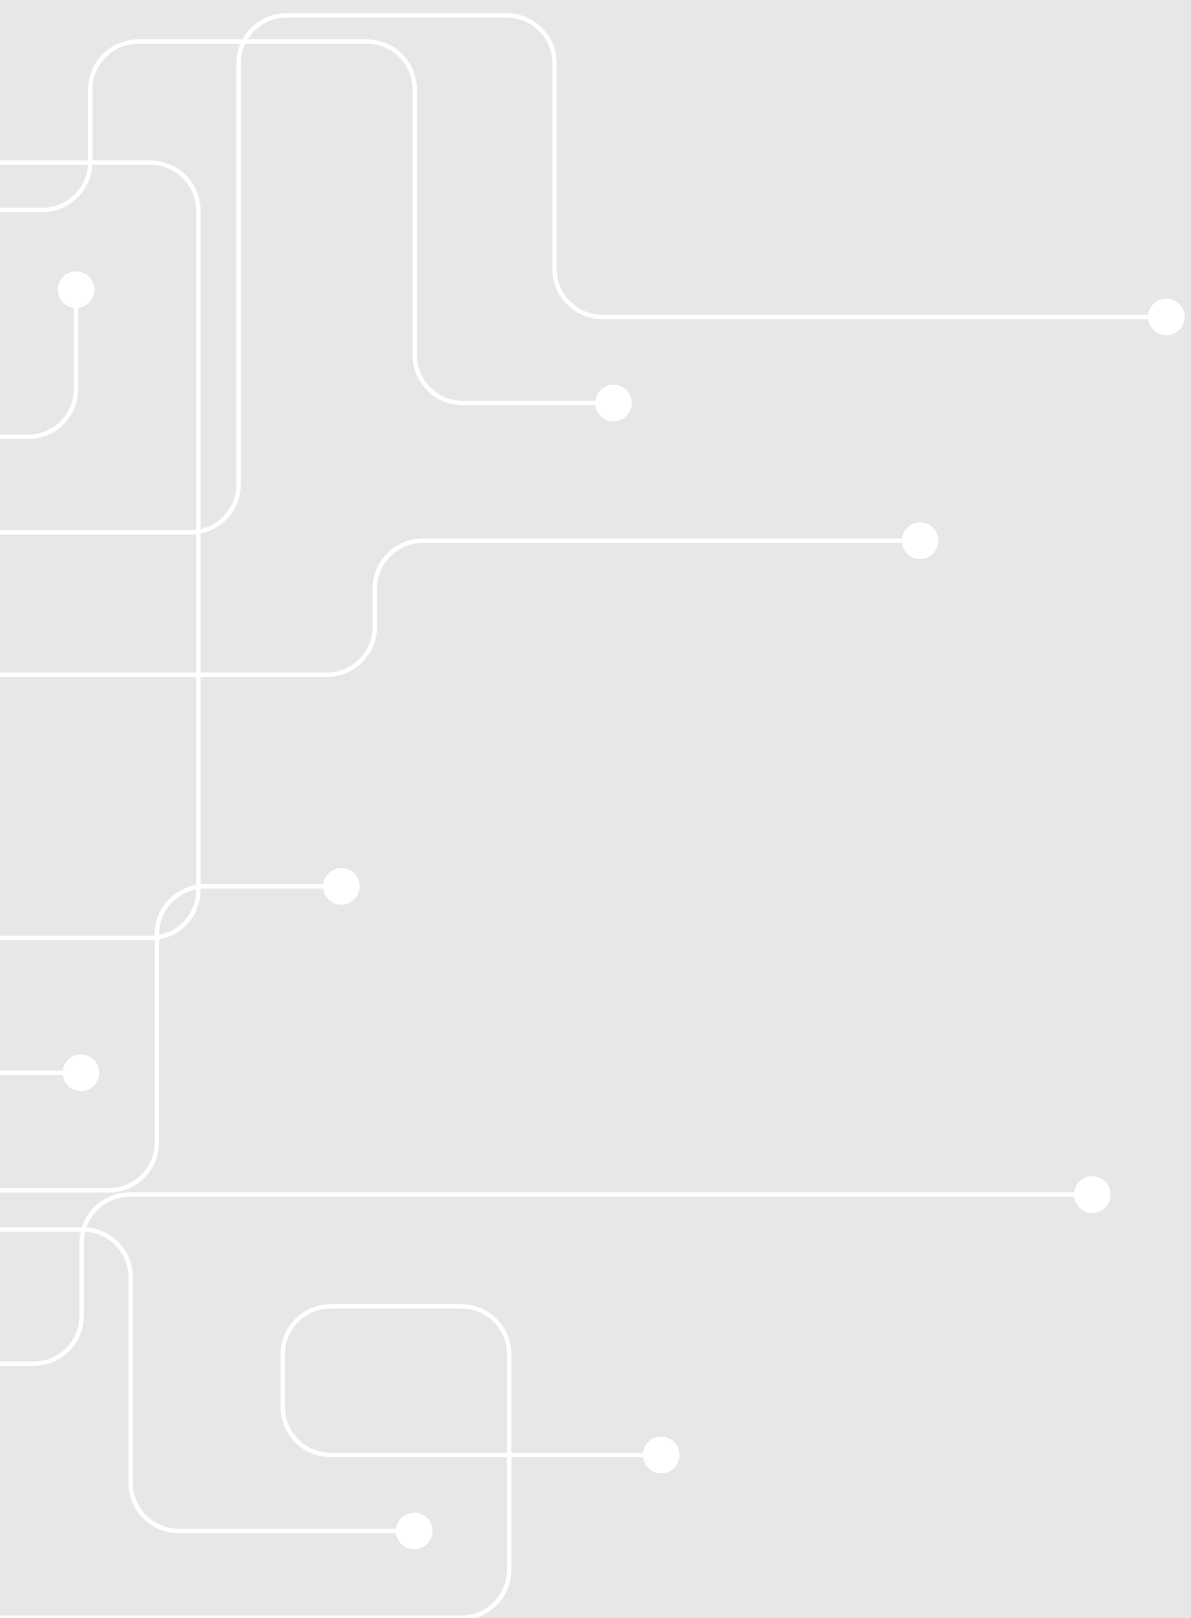

¹ Respondents could describe their plans regarding the number of employees for the next three months as "increasing," "stable," or "decreasing". The balance value of these plans is the difference in the percentage shares of the "increasing" and "decreasing" responses. The BAG Employment Barometer is a weighted mean of the balances in different sectors. The BAG Employment Barometer can be between -100 and +100. -100 means all surveyed businesses expect employment to decrease in the next three months, while +100 means all surveyed businesses expect employment to increase in the next three months.
